

Questasy: Import of SCP Data

Edwin de Vet

CentERdata
Institute for data collection and research

Data

- <http://nesstar.dans.knaw.nl> (DDI files)
- MS Access database
- 22 Waves
- No clear distinction between question and variable
- Questions are reused in waves
- Reused questions might not be identical
- Questions can contain a pre-questiontext

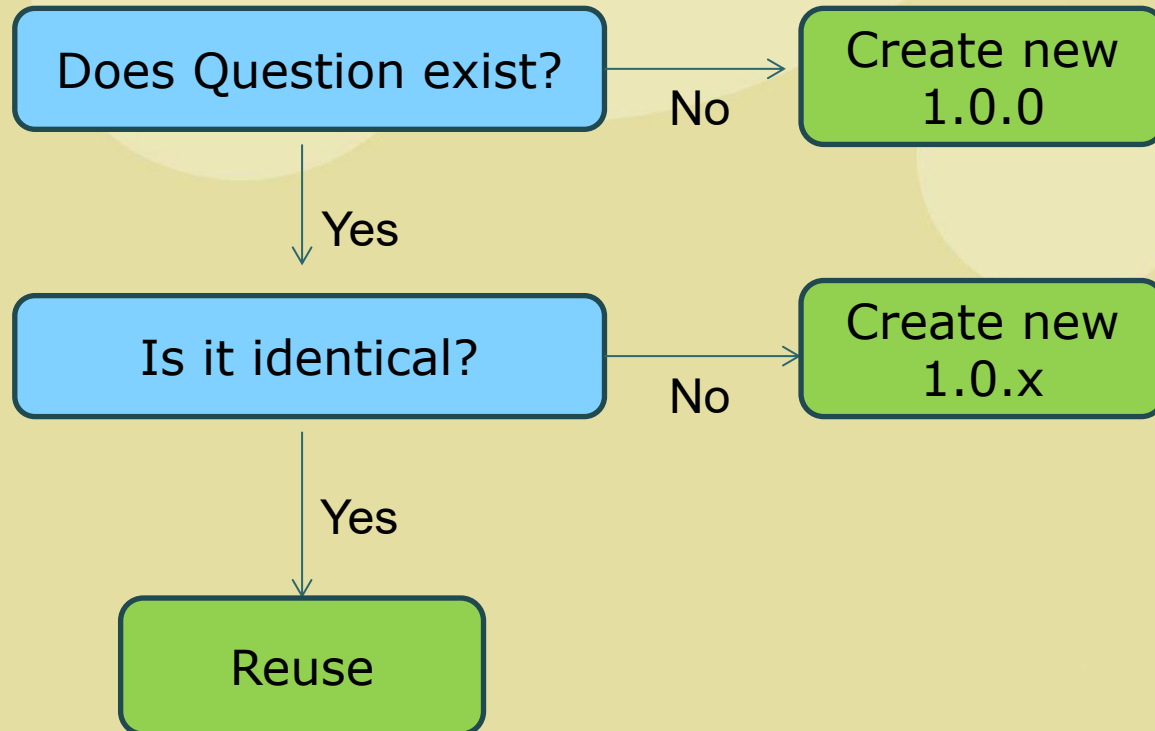

Import

- Longitudinal study with multiple waves
- One Question Scheme
- Each wave Control Construct Scheme
- Nesstar DDI files automatically interpreted and converted to MySQL queries

Import

Header / Sub-question

- Grouping of questions based on the pre-question text
- Questions are grouped if the pre-question text of successive questions are (nearly) identical
- The pre-question text becomes the header question, the question text the sub-question
