How to Present an Application Based on DDI 3 to the World Out There?

*Experiences from a project in which we have
built an online survey data dissemination
application based on DDI 3*

Marika Puumala

CentERdata
Institute for data collection and research

Overview

- Background
- Project
- Working with DDI
- Results
- Next steps

LISS panel

- Diverse surveys each month (CAWI)
- Longitudinal studies
- (Nearly) all data to be disseminated online
- No prior data archive, only SPSS/STATA files and codebooks

Project Goal 1/2

- Goal 1:
 - Simple website with a simple database

5

12/7/2009

Dagstuhl 2007

6

12/7/2009

Project Goal 2/2

- Goal 2: Website with a database using DDI 3 elements and relations

7

12/7/2009

First reaction

- 'Control Construct WHAT?'
- 'Using DDI is a lot more work.'
- 'Can't we adjust things into our way of thinking?'

8

12/7/2009

Working with DDI:

- 1. Using only what we needed

9

12/7/2009

How we proceeded

1. Compare our list of required fields to DDI 3
2. Go through all DDI fields to find additional, useful fields which we hadn't thought of
3. Design the database fields & relations according to DDI 3, add as few extra fields as possible
4. User interfaces (website)

10

12/7/2009

DDI elements we chose to use

- Citation
- Code / Code Scheme
- Coding
- Collection Event
- Concept / Concept Scheme
- Conceptual Component
- Data Collection
- Funding Information
- Group
- Organization / Organization Scheme
- Other Material
- Physical Data Product
- Physical Instance
- Question Construct / Control Construct Scheme
- Question Item / Multiple Question Item / Question Scheme
- Representation
- Response Domain
- Study Unit
- Variable / Variable Scheme

11

12/7/2009

Working with DDI:

- 2. Breaking through the codebook mindset

12

12/7/2009

Understanding distinction between questions and variables

Question

Date of birth: [dd]-[mm]-[yyyy]

Coding

Variable

Age in categories

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	1 14 years and younger	2290	19,3	19,3	19,3
	2 15 - 24 years	1564	13,2	13,2	32,5
	3 25 - 34 years	1338	11,3	11,3	43,8
	4 35 - 44 years	1948	16,4	16,4	60,3
	5 45 - 54 years	1955	16,5	16,5	76,8
	6 55 - 64 years	1633	13,8	13,8	90,6
	7 65 years and older	1116	9,4	9,4	100,0
Total		11844	100,0	100,0	

13

12/7/2009

Working with DDI

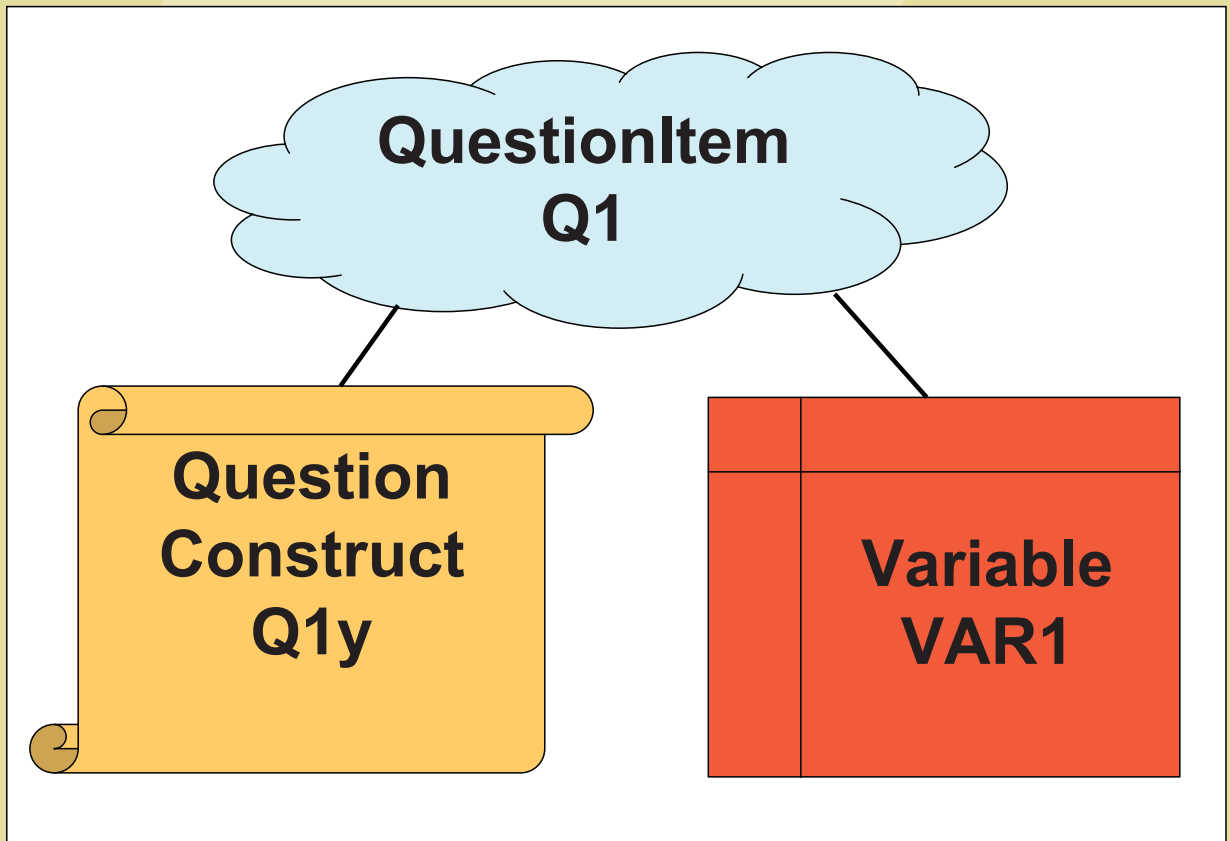

- 3. Will external users understand it?

14

12/7/2009

How to manage, name and present?

15

12/7/2009

Project conclusions

- Simplified and translated things for external web views (researchers don't need to speak DDI)
- DDI compatible database enables DDI export in endless ways
- DDI 3 makes sense after all!

LISS Panel - listening to people

Obtaining data for your research can be easy. This is what the LISS panel is here for, to do away with the obstacles of expensive data collection.

The LISS panel is the core element of the MESS project (Measurement and Experimentation in the Social Sciences). This project is devoted to enabling researchers to benefit from existing data, to carry out their own survey or to design a special experiment.

All LISS data published on the website are freely available to academic researchers.

Questionnaire Personality

Description This questionnaire was originally conducted in Dutch.

Study Unit Wave 1

	Question	Question Text	Answer Type
1	{intro}	This questionnaire consists of a variety of statements that can be applicable to you to a greater or lesser extent. There are no right or wrong answers. Try not to give too much thought to the questions. The first answer that comes to mind is usually the best.	
2	cp001-cp009	We'd like to ask you some questions about research. Could you please indicate to what extent you agree with the following statements? 1 = totally disagree 7 = totally agree	
3	cp010	On the whole, how happy would you say you are?	Categories
4	cp011	How satisfied are you with the life you lead at the moment?	Categories
5	cp012	How do you feel at the moment?	Categories
6	cp013	In general, how do you feel?	Categories
7	cp014-cp018	Below are five statements with which you may agree or disagree. Using the 1-7 scale below, indicate your agreement with each item by placing the appropriate number on the line preceding that item. Please be open and honest in your responding. 1 = strongly disagree 2 = disagree 3 = slightly disagree 4 = neither agree nor disagree 5 = slightly agree 6 = agree 7 = strongly agree	
8	cp019	Generally speaking, would you say that most people can be trusted, or that you can't be too careful in dealing with people? Please indicate a score of 0 to 10.	Categories

For a better look go to:

www.lissdata.nl

Finally

- Some open issues, e.g. visualizations in online questionnaires?
- Researchers used to a codebook approach: change takes time
- Simple presentation of complex structures is challenging
- Keep on developing DDI!

Next steps

- DDI XML export: underway
- Improving user interfaces
- Additional DDI fields in database
- Publications
- Data Usage Statistics
- Thesaurus?
- Automated questionnaire import?
- Questasy applied to other organizations?
